GP344

Unobtrusive - light in weight and size, the GP344 opens new frontiers of communication. It's small and smart, yet rugged and reliable, and will never let you down, even in the harshest of environments. The GP344 is 30% lighter than its comparable GP340 so your team and the public will hardly realise they are carrying them. At the same time the GP344 has passed all of Motorola's stringent quality testing thereby guaranteeing the high quality that you have come to expect from Motorola.

Operator-friendly controls and user features include :

- **X-PAND VOICE COMPRESSION AND LOW LEVEL EXPANSION**
Provides crisp, clear and strong audio quality in virtually any noisy environment. Low level expansion allows further improvements in audio quality by reducing noise heard during pauses in conversation.
- **WHISPER**
Allows a user to speak quietly into a radio and still be heard clearly by other radio users.
- **VOICE OPERATED TRANSMIT**
Allows total hands-free operation with a headset accessory when the radio is carried on a belt or shoulder strap.
- **SIGNALLING**
The radio software encompasses CTCSS and Selcall as standard.
- **LONE WORKER**
Using Selcall signalling, the radio enters emergency mode if the user does not respond to a warning call, adding security and safety for individuals who work remotely from their team.
- **EMERGENCY SIGNALLING**
Sends a Selcall help signal to a pre-defined person or group within the team.
- **CALL FORWARD**
Allows calls to be forwarded onto another radio or radios, using Selcall, if calls cannot be answered personally.
- **ADJUSTABLE POWER LEVELS**
The radio's output power has two settings: low power extends battery life and high power allows the radio to transmit over greater distances.
- **TIME OUT TIMER**
Limits the amount of time a user has to continuously transmit. This allows for more efficient use of the channel.
- **SMALL AND LIGHTWEIGHT**
Weighing only 250/270 gms (Slim/High Capacity Lilon batteries), and measuring just 101.5mm * 55.5mm * 30.5/35.5mm the GP344 is easy to carry and unobtrusive.
- **MOTOROLA ORIGINAL ACCESSORIES**
A full range of audio/mic and battery options allows easy customisation for all applications
- **IN-BUILT RUGGEDNESS**
Built to MIL STD 810 C/D/E and IP54 ensures a long working life, even in the toughest conditions.
- **CHANNEL SCAN**
Allows activity on different channels to be monitored and answered

CONTACT

Designed and printed by European Radio Supplies, the Marketing Division of Airsys Communications Technology Ltd.

Warranty - The GP Professional Series comes complete with a 12 month Motorola warranty, subject to Motorola's standard terms and conditions and that radio serial numbers are of United Kingdom origin.
